SHESC is Proud to Present

BAIP

Blending Assessment with Instruction Program

SHESC is pleased to bring to you the Blending Assessment with Instruction Program, which is based on the logic that students learn best in an environment where assessment and instruction are blended to support teachers and engage students.

BAIP is designed to benefit students by providing teachers with high-quality instructional resources and timely access to students' performance data. These lessons are self-contained and aligned to the Kansas Curricular Standards for Mathematics. This program provides three sets of Web-based resources for grades 3 through 8 and high school that are based on Kansas mathematics standards and tested indicators. These are:

- ≈ Lessons for use by teachers
- π Independent online study tutorials for students
- % A Data Reporting System

OUTCOMES: You will

be able to view BAIP as a supplemental resource that compliments their instructional program in math.
be familiar with the frameworks and underlying rationale for lesson design.
be able to easily access the BAIP website.

This will be a hands-on session with computers. Other sessions will be scheduled in December. We will also be happy to do onsite presentations in your computer lab with internet access. Please feel free to contact the Service Center for more information.

Please register ASAP to reserve your space

Title: BAIP DATE OF WORKSHOP: see above YOU MUST REGISTER one week in advance to avoid a \$5 late fee. You may return this form, phone or email your registration. District will be billed unless cancellation is received **two business** days prior to workshop date. If you need special assistance, please let us know! We reserve the right to cancel on registration deadline if there is insufficient participation.
