**ICE**

## Can you feel the chill???

The first ever ICE conference will be held on **June 17th and 18th at Salina Central High School, Salina, Kansas**. We are extremely excited to be offering this professional learning opportunity to the teachers of USD #305, as well as to educators in the area.

What is ICE? ICE stands for **I**nnovation and **C**reativity in **E**ducation. This is precisely what we want the ICE conference to be - a place where we can all learn about new ideas for integrating technology and gain valuable skills from how-to sessions. In addition to the classroom integration emphasis, we will also have sessions dedicated to IT and Tech Directors on Day 1 of the conference. However, the ICE conference will not just address technology issues and concerns; instead, we hope to push you to think differently about teaching and learning .

Our Keynote Speaker, Dee Lanier, is a technology consultant for EduTechServe in North Carolina. He is a Google Education Trainer and co-founder of the "Think Open"

initiative which purposes to advocate for cross-platform, cloud-based, cost-effective solutions to benefit all students.

So, if you are looking for an affordable, high-energy learning opportunity this summer, come join us at ICE. It's going to be really COOL!
