Background Information

According to the United Nations’ agency specializing in world labor and employment issues, agriculture accounts for over 36 percent of world employment. In the United States, more than one in seven people hold a career in the agriculture industry; in Kansas, nearly one in five people are employed in the agriculture industry. There are more than 250 career fields in agriculture, including careers in science, business and communications. Many people employed in these career fields do not have a farm background or experience in production agriculture.

Information adapted from KFAC’s Exploring Kansas Natural Resources Educator’s Guide.

Instructional Format

1. Each student will choose an agriculture career which interests them. Career choices can be found on pages 175-178 of *KFAC’s Exploring Kansas Natural Resources Educator’s Guide*.
2. Students will compose a paper (length to be determined by teacher) using the 6 Traits of Writing on their chosen agriculture career.

I Want a Job in Agriculture

3. After students have composed their 6-trait paper, they will construct a “hat” representing their chosen career from newspaper and duct tape.
4. Students will share with the class information on their chosen agriculture career while wearing their newspaper hat.
