

HP Z VR Backpack G2

+

HP Reverb VR Bundle

UNTETHER FROM REALITY

The light, comfortable backpack design and hot swappable batteries provide unrestricted freedom within your immersive experience. Prepare, demonstrate, and teach students with VR without getting tangled up in cords.

The full potential of VR is brought to life with the most powerful wearable VR PC ever created. Experience what fully immersive and untethered VR can bring to your classroom.

Extreme power takes rich content head on

Experience high-end performance VR even under the most strenuous demands of complex simulations. Best-in-class processing power and the latest high-fidelity graphic card help prevent disruptive dropped frames so you can work in VR for as long as you need.

SURREAL. SO. REAL.

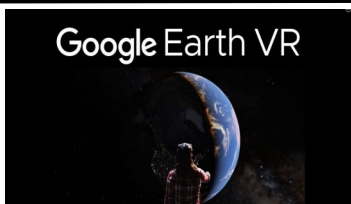

Teleport around boundless virtual worlds sitting at your desk, or create a dedicated room-scale play area where you can physically walk around.

Fully Immersive

Precise controller and headset tracking, realistic graphics, directional audio and HD haptic feedback mean realistic movement and actions in the virtual world. It doesn't get more first-person than this. Windows MR and SteamVR compatibility plus integrated Bluetooth® makes for easy syncing and superb controller tracking. All the latest tech, none of the hassle.

Take your class to places a school bus can't

By accessing the Microsoft Store or Steam library, free and purchasable content is available to take students inside the human body and mind, tour the solar system, create art in an open 3D canvas or display hard to portray mathematical models or graphs, and so much more.
